

Hand Tools at Wire Processing & Crimping Technology

- Handling
- Cutting
- Stripping
- Crimping
- Testing
- Open crimp barrel
- Insulated cable lug
- Ferulle
- Turned contact

Content

1. Preface	13
1.1 Important Notes on this Documentation	14
1.2 Partners and Sources.....	15
2. Introduction: Technologies of Wire Processing Technologies	16
2.1 A Fact.....	16
2.2 Crimping – A Joining Method.....	17
2.3 Standards, Factory Standards and Specifications for Crimp Connections	17
2.4 Processing of Stranded Copper Conductors	19
2.5 Development of Crimp Connections	20
2.6 Contact Resistance – The Underestimated Quality Criterion	21
2.7 Correct Assignment between Crimp Contact and Nominal Cross Section	22
2.8 The Objective of Wire Harness Making.....	23
2.9 The Objective of Crimping Technology	24
2.10 Reproducible Quality: Equipment	25
2.11 The Transition Zone – Where Flexible turns into Solid	26
2.12 The Effect of Mechanical Loads	27
2.13 Comparison of the Transition in Different Types of Connections	28
2.13.1 Overview	28
2.13.2 Soldered Connections.....	29
2.13.2.1 Tinned Conductors in Screw Terminals.....	29
2.13.2.2 Soldering and Connector Housings.....	30
2.13.2.3 Direct Soldering with Components	30
2.13.2.4 Soldering after Crimping	31
2.13.2.5 Soldering of the Conductor Crimp Area Before Crimping.....	31
2.13.3 Screw Terminals.....	32
2.13.3.1 Wire Ferrules and Screw Terminals	32
2.13.3.2 Insulated Cable Lug.....	33
2.13.4 Closed Crimp Barrel (4-Indent Crimp)	34
2.13.5 Open Crimp Barrel.....	34
2.14 Relieving the Transition Zone	35
2.15 Crimp Contacts, Cable Lugs and other Pressed Connectors.....	36
2.15.1 Open and Closed Barrel Crimp Contacts.....	36
2.15.2 The Open crimp Barrel.....	36
2.15.3 The Closed Crimp Barrel.....	37
2.16 Overview of Crimp Shapes	38
2.16.1 Open Crimp Sleeves.....	38
2.16.2 Closed Crimp Barrels.....	39
3. The Conductor	41
3.1 Basic Conductor Structure.....	41

3.2	Classification of Conductors	42
3.3	Notes on the Processing of Conductor Materials	42
3.4	Geometric Cross-Section vs. Nominal Cross-Section	43
3.5	The Conductor Insulation	46
3.6	Cables with Reduced Insulation	47
3.7	American Wire Gauge [AWG] and Metric Wire Standards.....	48
4.	Hand Tools in Cable Processing – Cutting & Stripping	49
4.1	Important Information on Working with Hand Tools.....	49
4.2	Cutting Cabels and Wires.....	49
4.2.1	The Cable Shear	50
4.2.2	Comparison: Cable Shear vs. Side Cutter	51
4.3	Jacketing with Hand Tools.....	52
4.3.1	Jacketing Sheathed Cables	52
4.3.2	General	52
4.3.3	Structure of Multi-Core Sheathed Cables	52
4.3.4	Error Descriptions.....	53
4.3.5	Hand Tools for Jacket Stripping	54
4.4	Stripping with Hand Tools.....	55
4.4.1	Basic Principles of Stripping.....	55
4.4.2	Stripping Result Requirements.....	56
4.4.3	Spripping Blades – Types of Wire Strippers	56
4.4.4	Wire Stripper with Straight Blades.....	57
4.4.5	Stripping Tool with V-Shaped Blades	58
4.4.6	Stripping Tool with Radius Baldes.....	58
4.4.7	Error Descriptions for Hand Strippers.....	60
4.4.7.1	Overview	60
4.4.7.2	Damaged and/or Cut Wire Strands	61
4.4.7.3	Pulled Wire Strand.....	61
4.4.7.4	Scratched Wire Strand Surface.....	62
4.4.7.5	Improperly Cut Insulation	62
4.4.7.6	Insulation Threads on the Insulation Cutting Edge.....	63
4.4.7.7	Insulation Damaged.....	64
4.4.7.8	Insulation Parts on the Wire Strands	65
4.4.7.9	Twisting of the Wire Strands Undone	65
4.4.7.10	Broom-Shaped Conductor End	65
4.4.7.11	Bent Wire Strand(s)	66
4.4.7.12	Overtwisted Conductuor Strands	67
4.5	Work Instruction for Stripping with Hand Tools.....	68
4.5.1	Standard Wire Strippers.....	68
4.5.2	Hand Stripping Tools with Radius Blades.....	69
4.5.3	Checking the Stripping Results:	69

5. Test Method and Application	70
5.1 Fundamentals and General Information.....	70
5.1.1 Tests as a Source of Error	72
5.1.2 Which Test Detects Which Errors.....	74
5.1.3 When To Perform Which Test?	75
5.1.4 In-Production Testing Regarding Processing Equipment	76
5.1.5 Special Release – Risk Assessment of A Crimp Connection	77
5.2 Visual Inspection.....	78
5.2.1 The Visual Inspection Protocol.....	78
5.3 Measuring Crimp Dimensions.....	79
5.3.1 Wire Crimp Height – Open Crimp Barrel.....	79
5.3.2 Measuring Tools– Open Crimp Barrel	79
5.3.3 Measurement Procedure – Open Crimp Barrel.....	81
5.3.4 Wire Crimp Width – Open Crimp Barrel.....	82
5.4 Pull-out Test.....	83
5.4.1 General	83
5.4.2 Requirements for a Pull-Out Tester.....	83
5.4.2.1 Pull-Out Tester Types.....	83
5.4.2.2 Receptacle for Crimp Contacts	84
5.4.2.3 Clamping Device for the Wire	85
5.4.3 Test Preparations	86
5.4.4 Pull-Out Test – Procedure.....	86
5.4.5 Visual Evaluation During the Pull-Out Test.....	87
5.4.6 Errors and Interfering Factors During Pull-Out Tests	88
5.4.6.1 Closed Insulation Crimp Flanks / Insulation Crimp.....	88
5.4.6.2 Subsequent Opening of the Insulation Crimp Flanks	88
5.4.6.3 Holding the Test Specimen by Hand	89
5.4.6.4 Crimp Contact Bending in the Receptacle.....	89
5.4.6.5 Jerky, Fast Pull-Out	90
5.4.7 Application Examples.....	90
5.4.8 Pull-out Force in Relation to the Wire Crimp Height.....	91
5.4.9 Pull-Out Values Open Crimp Barrel.....	92
5.4.10 Pull-Out Values Crimp Connection.....	92
5.5 Micrograph Preparation.....	93
5.5.1 Principles.....	93
5.5.2 Position of the Microsection	95
5.5.3 Separating and Polishing the Crimp Contact	95
5.5.4 Cleaning the Microsection.....	96
5.5.5 Measuring the Crimp Geometry	96
5.5.6 Errors in Micrograph Evaluation	96
5.5.7 Example of a Micrograph Documentation.....	97

5.5.8	The Insides of a Crimp – Open Crimp Barrel	99
5.5.9	The Limits of Crimping Technology – Open Crimp Barrel	100
5.5.10	Evaluation Criteria for Micrographs	101
6.	Crimping: Open Barrel Crimp Connectors	102
6.1	The Basics	102
6.1.1	Terms & Definitions	102
6.1.2	Open Crimp Barrels	102
6.1.3	Advantages and Disadvantages of Open Crimp Sleeves	103
6.1.4	The Wire Crimp of an Open Crimp Sleeve	104
6.1.5	Compression Ratio for Open Crimp Sleeves	105
6.1.6	What does „Gas-Tightness“ mean?	106
6.1.7	Cross-Section Filling – The Effects of Missing Wire Strands	107
6.1.8	Soldering Crimp Connections	108
6.1.9	Processing Open Crimp Sleeves	110
6.1.9.1	Embossings in the Wire Crimp Area	110
6.1.9.2	Single Contacts	110
6.1.10	Overview of Crimp Shapes	111
6.1.11	Assignment	112
6.1.11.1	Assignment Crimp Contact – Nominal Cross Section – Tooling	112
6.1.11.2	Assignment: Conductor Nominal Cross Section – Crimp Contact	113
6.1.11.3	Assignment: Insulation Diameter – Crimp Contact	114
6.1.12	Mechanical Play of the Crimped Contact in the Housing	115
6.1.12.1	Effects of Lacking Cavity Play	116
6.2	Overview of the Crimp Connection Areas	117
6.3	Wire and Wire Positions	118
6.3.1	The Stripping Length	118
6.3.2	Inserting and Positioning the Stripped Wire into the Crimp Contact	119
6.3.2.1	Conductor End / Conductor Protrusion	119
6.3.2.2	Position of Conductor and Seal in the Crimp Contact	119
6.3.2.3	Seal Positions	120
6.4	The Wire Crimp Area	120
6.4.1	Wire Crimp: Creating a Crimp Connection	121
6.4.2	Crimp Dimensions	122
6.4.2.1	Wire Crimp Height	122
6.4.2.2	Tolerances	123
6.4.2.3	Wire Crimp Height and Properties of Crimp Connections	124
6.4.2.4	The Crimp Height – A Compromise	124
6.4.2.5	Crimp Dimensions & Micrograph	125
6.4.2.6	Wire Crimp Width	126
6.4.3	The Rear Bellmouth	127
6.4.3.1	Task & Origin	128

6.4.3.2	Wire Crimper & Bellmouth	129
6.4.3.3	Size of the Rear Bellmouth	129
6.4.3.4	Bellmouth Formation – Hand Tools	130
6.4.3.5	Effects of a Missing Rear Bellmouth.....	131
6.4.3.6	Causes for the Lack of a Bellmouth.....	132
6.4.3.7	Effects of an Excessive Rear Bellmouth.....	132
6.4.4	The Front Bellmouth	134
6.4.5	Burr Height and Width at the Crimp Base.....	135
6.4.6	Number of Captured Wire Strands and the Stripping Result	136
6.4.7	Crimp Flank Design	136
6.4.7.1	Crimp Flank Symmetry	137
6.4.7.2	Position and Location of the Crimp flank Tips.....	137
6.4.7.3	Material Thickness of the Crimp Contacts Base	137
6.4.7.4	Supporting Height.....	137
6.4.7.5	Supporting Angle	137
6.4.7.6	Error Description – Curling of the Crimp Flanks.....	138
6.5	The Insulation Crimp	141
6.5.1	Insulation crimp Shapes and Requirements	141
6.5.1.1	Overview – Insulation Crimp Shapes	141
6.5.1.2	Determining the Insulation Crimp Dimensions.....	142
6.5.1.3	Bending Test	142
6.5.1.4	Wrapping Test.....	143
6.5.1.5	B/F-Shape Insulation Crimp.....	144
6.5.1.6	B/F-Shape Insulation Crimp: Common Errors.....	144
6.5.1.7	B/F -Shape Insulation Crimp: Special Variant.....	145
6.5.1.8	Overlap Crimp (OV).....	145
6.5.1.9	Formation of an Overlap Crimp.....	145
6.5.1.10	Overlap Crimp: Common Errors.....	146
6.5.1.11	The Asymmetric O-Crimp	147
6.5.1.12	Asymmetric O-Crimp: Common Errors.....	147
6.5.1.13	Asymmetric O-Crimp with Seal	148
6.5.1.14	Asymmetric O-Crimp with Seal: Common Error.....	148
6.5.1.15	Symmetric O-Crimp with Seal	148
6.5.1.16	Symmetric O-Crimp with Seal: Common Errors.....	148
6.5.1.17	Insulation Crimp: Position Deviation and Contact Geometry	149
6.5.1	Positional Deviation (Tilting) of the Insulation Crimp Flanks.....	150
6.6	Single Wire Seal Assembly – Conductor Sealing	151
6.6.1	The Seal.....	151
6.6.2	Assignment of the Seal to the Crimp Contact	152
6.6.3	Insulation Crimp Shapes for Seal Processing.....	152
6.6.4	Assembly of Sealed Crimp Contacts	153

6.7	Transition or Connection of the Wire Crimp to the Functional Area	154
6.8	The Functional Area.....	155
6.8.1	Positive-Locking Connection.....	155
6.8.2	Spring-Loaded Contact Surfaces	156
6.8.1	The Contact Area	157
6.8.2	The Connector Thickness	158
6.8.3	Mating Force – Tensile Force.....	158
6.8.4	Latching Function – Latches	159
6.8.5	Damage due to Functional Tests.....	160
6.10	Symmetries in the Crimp Connection.....	161
6.10.1	Symmetry: Position Deviation (Bending) WC/IC	161
6.11	The Cut-off Tab – Connection to the Carrier Strip	163
6.11.1	Cut-Off Tab Length.....	163
6.11.2	Cut-Off Tab Length in Sealed Contacts.....	163
6.11.3	Cut-off Tab – The Burr	163
6.11.4	Contact Separation for Hand Crimping Pliers	164
7.	Hand Crimp Tools: Processing Open Barrel Contacts.....	165
7.1	Introduction and Fundamentals	165
7.2	Attainable, Repeatable Quality	168
7.3	Checklist for a Good Crimp Connection.....	169
7.4	Requirements for Hand Crimp Tools.....	169
7.5	Hand Crimp Tool – Types.....	170
7.6	Hand Crimp Tools – Types and Differences.....	171
7.7	Overview of the Composition of Hand Crimp Tools.....	172
7.8	The Positioning Aid (Locator)	173
7.9	Wear & Mechanical Force –The Adjuster Wheel.....	173
7.10	The Crimping Die Set - Assignments.....	174
7.11	Emergency Release Function – Opening the Hand Crimp Tool.....	178
7.12	Handling of Hand Crimp Tools.....	178
7.13	The Table Mount.....	179
7.14	Preparing the Crimp Contact	182
7.14.1	Cutoff Tabs.....	183
7.14.2	Separating Crimp Contacts - Tools	183
7.15	Working with Hand Crimp Tools – Open Crimp Barrell.....	184
7.15.1	Positioning Crimp Contacts – Insertion Depth	184
7.15.2	Positioning the Crimp Contact – Position between the Crimp Dies.....	187
7.15.3	Inserting the Stripped Wire.....	189
7.15.4	Positioning the Stripped Wire in the Crimp Contact	190
7.16	Crimp Result Evaluation	191
7.17	An Overview of the Most Common Errors.....	192
7.18	Poor Crimping Result - What To Do?.....	193

7.19	Cut Off and Start all Over!	194
7.20	Calibration - Inspection – Maintenance.....	195
7.20.1	Hand Tool Calibration	195
7.20.2	Hand Crimp Tool Maintenance.....	195
7.20.3	Inspection of Hand Crimp Tools	195
7.20.4	Checking The Positioning Aid (Locator).....	196
7.20.5	Crimp Quality Check:	196
7.21	Work Instructions: Creating a Crimp Connection.....	197
7.21.1	Determining the Stripping Length	197
7.21.2	Standard Stripping Pliers	197
7.21.3	Hand Stripper with Radius Blades.....	198
7.21.4	Check Stripping Result	198
7.21.5	Hand Crimp Tools for Open Barrel Contacts	199
7.21.6	Approval & Quality Check	199
7.21.7	Producing a Crimp Connection	199
7.21.7.1	Separating Crimp Contacts.....	199
7.21.7.2	Hand Crimp Tools with Locator	200
7.21.7.3	Hand Crimp Tools without Locator	200
7.21.7.4	Visual Inspection	201
8.	Closed Crimp Barrels	202
8.1	Types and Crimp Shapes	202
9.	Wire End Ferrules	204
9.1	Basics.....	204
9.2	Wire End Ferrule Types	206
9.3	Crimp Shapes	207
9.4	Plastic Collar Insulation – With or Without	208
9.5	Structure of Wire End Ferrules	208
9.6	Conductor Protrusion	209
9.7	Stripping Length.....	209
9.8	Assignment	209
9.9	Requirement on the Crimp	210
9.10	Processing Wire End Ferrules	211
9.11	Creating A Crimp with Ferrules.....	212
9.12	Creating a Ferrule Crimp with Hand Tools	212
9.12.1	Determining the Stripping Length	212
9.12.2	Setting the Stripping Length on the Pliers.....	213
9.12.3	Creating a Crimp Connection with a Ferrule.....	213
9.13	Visual Inspection & Error Descriptions.....	214
9.14	Hidden Errors.....	214
9.15	Installation of Wires with Ferrules	216
9.16	The Micrograph.....	216
9.17	The Pull-Out Test.....	217

9.18	Pull-Out Values for Wire End Ferrules	218
9.19	Ferrule Color Codes (example: Germany)	218
10.	Turned Contacts – 4/8-Indent Crimp	219
10.1	General.....	219
10.2	Contact Shape	219
10.3	Structure and Geometry	220
10.4	Requirements on the Contact Material.....	220
10.5	Processing Turned Contacts	221
10.6	Hand Crimp Tools	222
10.7	Wear in Crimping Tools.....	222
10.8	Positioning Aid – Locator.....	224
10.9	The Indenters.....	224
10.10	Positioning and Crimping.....	225
10.11	Micrographs of a Crimping Process.....	226
10.12	Error Descriptions	227
10.12.1	Deformed Crimp Contact BEFORE Crimping	227
10.12.2	Deformed Crimp Contact AFTER Crimping	227
10.12.3	Hidden Errors	228
10.12.4	Broken Wire Strands.....	228
10.12.5	Micrographs.....	229
10.13	Creating a Crimp Connection: Turned Crimp Contacts.....	230
10.13.1	Preparation before Crimping: Wire Stripping	230
10.13.2	Important check before starting work:.....	230
10.13.3	Preparation for Crimping: Adjusting The Hand Crimping Tool.....	232
10.13.4	Creating a Crimp Connection.....	233
10.13.1	Visual Inspection of the Crimp Connection	234
11.	Insulated Cable Lugs	235
11.1	Processing Methods.....	235
11.2	Hand Crimp Tools and Die Sets	235
11.3	Crimp Applicators.....	235
11.4	Compression via the Insulation Sleeve	236
11.5	Error: Stress Whitening	237
11.6	Contact Assignment – Color Code.....	237
11.7	Structure of Insulated Cable Lugs.....	238
11.7.1	Standard Version – Without Insulation Fixation	238
11.7.2	Insulated Cable Lugs with Insulation Fixation	239
11.1	Requirements for the Crimp Connection	241
11.2	Position in the Crimp Tool	242
11.3	Multiple Crimp.....	243
11.4	Compensating Cross-Section Differences	243
11.5	Testing Insulated Cable Lugs	244
11.5.1	Insulation Fixation.....	244

11.5.2	Pull-Out Test	245
11.5.3	Visual Inspection	245
11.5.4	Micrograph Verification	246
11.5.5	Overview: Errors when Processing Insulated Cable Lugs	247
11.6	Insulated Butt Connector	247
12.	Closed Crimp Barrels	248
12.1	Contact Variants and Crimp Shapes	248
12.2	Quality Requirements – The Micrograph	249
12.1	Compression Lug – Tubular Lug – Solderless Terminal	250
12.1.1	Tubular Lugs for Special Applications	251
12.1.2	Contact Material for Cable Lugs	251
12.1.3	Classification of Conductors	251
12.2	Hexagonal Crimp Shape	252
12.2.1	Crimp Contact Types	253
12.2.1.1	Compression Cable Lug	253
12.2.1.2	Butt Connectors	253
12.2.2	Hexagonal Crimping of CU & AL - Terminals (Cable Lugs)	254
12.2.3	Number of Crimps	255
12.2.4	Crimping Sequence	255
12.2.5	Overveiw: Faulty Crimps	256
12.2.6	Creating a Crimp Connection	257
12.2.7	Measuring a Hexagonal Crimp	259
12.3	Indent Crimp Shape	260
12.3.1	Solderless Terminals	260
12.3.2	Creating an Indent Crimp	262
12.4	Deep Indent Crimp – Aluminum Connectors	263
12.4.1	General Information	263
12.4.2	Schematic Structure	263
12.4.3	Single and Double Indent Crimp	264
12.5	Other Crimp Shapes	265
12.5.1	The Dual System	265
12.5.2	Notch Crimp Shape	266
13.	Assembly – Disassembly of Crimp Contacts	267
13.1	Installing Wires	267
13.2	The Connector Housing	268
13.3	Latching Function – Latches	270
13.4	Cavity Play	271
13.5	The Crimp Contact in the Connector Housing	272
13.6	Connector Assembly	273
13.7	Checking the Assembly	276
13.8	Connector Assembly on Fully Automatic Units	277
13.9	Dissassembly of Crimp Contact and Housing	278

14. Getting Grip on Crimp Quality – How to Start?	282
14.1 Introduction	282
14.2 Fundamentals	283
14.3 Crimp Specifications	283
14.4 The Data Sheet.....	284
14.5 Data Collection.....	284
14.5.1 Crimp Contact.....	284
14.5.2 Data Collection Wire	285
14.6 The Crimp Tool	285
14.6.1 The Crimp Tool: A First Check.....	285
14.7 Sample Crimp and Visual Inspection	286
14.8 Visual Inspection Report	287
14.9 Sample crimp – Determining Measuring Results.....	287
14.10 Interim Result and Correction	288
14.11 The Micrograph.....	288
14.12 Evaluation and Archiving.....	289
14.13 Crimp Connection is Not OK! Now What?.....	289
15. Index.....	291
